

Polytan M

THE PROFESSIONAL CHOICE AMONG THE SPORTS SURFACES

It's fast, high damping, and has excellent values when it comes to sports medicine. These are all excellent prerequisites for performance and competitive sports in athletics facilities with running and run up tracks. The Canadian and British track and field teams recently also felt the same thing: the two teams chose sports facilities with the Polytan M surface for their preparation for the 2012 Olympic games in London. The Canadian athletes trained in the Kamen Kaiserau sports centre and British athletes trained on the running track at the Loughborough University in the UK.

AREAS OF USE

- Competitive running tracks
- Athletics stadiums
- Multipurpose facilities
- University sports facilities

PROPERTIES

- Poured surface
- Waterproof
- Granules with visible tips interspersed, ideally suited to spikes
- Can be certified according to IAAF requirements

System structure:
