

WATER-PERMEABLE (POROUS)

Polytan WS / WSS

THE ALL-ROUNDER FOR COMPETITION AND TRAINING FACILITIES

The Polytan WS or WSS synthetic surface is the cost effective solution for athletics. The structure coated surface is primarily used for running tracks, run-up tracks and athletics facilities. It is the only surface in the Polytan product range that has a structural spray-coated surface that is water permeable, therefore allowing for easy and fast installation.

AREAS OF USE

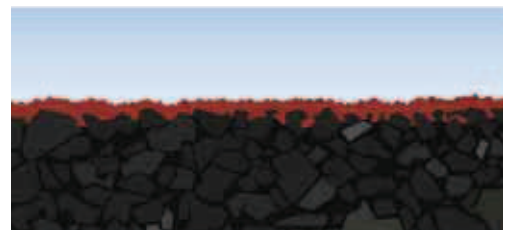

- Competitive running tracks
- Athletics stadiums
- Multipurpose facilities
- University sports facilities

PROPERTIES

- Structural spray-coated surface
- Water-permeable
- Bound granules, rough, spike-resistant
